

```
return Inertia::render('Subscriber/Form', [  
    'model' => new UpsertSubscriberViewModel(),  
]);
```

Inertia will pass this array to the Vue component, where we can accept it as a prop:

```
export default {  
  props: {  
    model: {  
      type: Object,  
      required: true,  
    },  
  },  
}
```

And the result:
