```html
<div>
  <div>
    Total: {{ this.total }}
  </div>
  <div>
    <button @click="$emit('paginatedPrev')"
:disabled="this.current_page === 1">
      Prev
    </button>
    <button @click="$emit('paginatedNext')">
      Next
    </button>
  </div>
</div>
```

Which can be used as:

```html
<Pagination
  :total="model.total"
  :current_page="model.subscribers.current_page"
  @paginated-prev="prevPage()"
  @paginated-next="nextPage()"
></Pagination>
```

And we can use the links given by the backend:

```js
methods: {
  nextPage() {
    if (!this.model.subscribers.next_page_url) {
```
